MADE IN INDIA

About Us

Suvi Industries is one of the leading manufacturers and exporters of a wide range of automotive components and industrial parts. We have expertise in design, development, and production of engineered, machined, forged, and gears, auto components and other critical engineering products to cater to both national and international markets. Since inception, we have achieved voluminous growth, which can be attributed to flexibility, transparency and precision.

Mr. Sikander Singh
(Managing Director)

Mr. Ajay Gupta
(Managing Director)

We have an enviable image in the global market through our untiring pursuance towards customer satisfaction and commitment fulfillment. Over the past years, we have designed and developed over 500 products and continue to innovate and reach new milestones.

We are dedicated to maintaining our commitment to providing the highest quality products and best in class customer service as customer satisfaction is what drives us and lies at the core of this company.

Mission

To work efficiently, innovate continuously and deliver high quality products enhancing all the stakeholders value.

Vision

To become a global supplier of advanced technical products by applying the latest technological advancements, innovation and service quality to create superior technical products and create a better company for ourselves, our customers, our community and the world.

Manufacturing

**Circular Saw
100 Dia**

Quality Assurance

We at "Suvi Industries" use quality assurance to ensure that all of our products meet the anticipated quality criteria. Quality is monitored and controlled using statistical process control approaches. Our proactive approach to quality management identifies possible problems, leads to continual improvement and produces consistent, high-quality products, reducing costs and increasing customer satisfaction.

QA promotes a positive business culture, boosts morale, and improves reputation.

To drive QA, we have a team of 20 experienced engineers who work around the clock to ensure high-quality products that match client requirements. For this, we have all of the latest tools, instruments, and machinery, along with a completely equipped standard room to facilitate quality objective setting.
